Work Experience

Software Developer Co-op

January 2014 - August 2014

Tantalus Systems

Python, Bottle.py, Xen,
Mercurial, HTML/CSS,
jQuery

- Created Ubuntu 12.04 virtual machines for use as test/build slave machines
- Maintained and upgraded OEL VMs for use in regression and automation teams
- Evaluated issues with existing automation tools and Jenkins plugins
- Implemented a test summary e-mail script to report test statuses in JIRA
- Built a web frontend to an in-house simulation tool with Bottle.py and jQuery

Software Developer Co-op Blackberry

January 2013 - August 2013

BAT, VMWare vSphere,
Jenkins, Maven, XML,
Ubuntu Server

- Carried out upgrades and maintenance to central BES testing build server
- Coordinated with developers on progress of test suite development
- Created, managed, and replicated virtual machines for developer test cases
- Deployed server and database artifacts through Apache Maven and Jenkins
- Modified various XML files to properly construct and deploy build artifacts

Projects

Front-End Developer

November 2015 - Today

Personal Portfolio

HTML5, SASS, Flexbox,
JavaScript

- Planned, prototyped, and finalized some simple designs for page layouts
- Experimented with various new features of CSS3 and Flexbox
- Implemented a fully responsive design applicable to many screen sizes
- Leveraged the benefits of SASS to improve my own workflow
- Continuing to improve the site for better readability and information flow
- Working on a remodeled project page setup using ReactJS

Front-End Developer

September 2015

Debate Camp
America

Zurb Foundation, SASS,
JavaScript, FileZilla

- Met and planned with stakeholders multiple times before final delivery
- Quickly constructed a full set of static pages promoting the client's business
- Iterated over designs with the client and other contacts to improve page clarity
- Implemented desired features such as hover transitions and slideshows
- Deployed final site via FTP upon client's request with JustHost

Education

Simon Fraser University

September 2010 - April 2016

8888 University Drive,
Burnaby, B.C., Canada

- Completed a Bachelor of Science in Computing Science
- Minor: Interactive Arts and Technology
